Northern Westchester Hospital Mt. Kisco, New York 2 Operating Rooms & Central Sterile Supply

We are very proud to have been selected by Northern Westchester Hospital to act as their Construction Management on this \$5.0 million expansion, renovation and modernization of their existing Operating Rooms and Central Sterile Supply Unit. Calgi was entrusted to manage and oversee the project on the Hospital's behalf and given total responsibility over the various Contractors, Architects and Design Professionals during the Construction Phase.

To accommodate the daily functions of the hospital and the requirements of the hospital staff and patient needs, the project was segmented into five phases over a two year period. Additionally, the project required great flexibility among the Contractors and Project Team to accommodate the life emergencies that arise in this environment.
