

ARCHITECT: Peter Gisolfi Associates

**City of Rye
Whitby Castle
Rye, NY**

As Construction Managers, we were entrusted by the City of Rye to oversee the design, restoration and construction of the Whitby Castle on their behalf.

Whitby Castle is a historical and cultural resource for the City of Rye and Westchester County. It is a significant example of American Gothic Revival Architecture designed and constructed in the Mid-19th Century by A. J. Davis

The project consisted of the historical restoration of the Castle and the construction of Banquet Halls and Kitchen facilities along with site work, landscaping and parking area. Constructed under the Wicks Law, we were responsible for the management and coordination of the multiple prime contractors. Because of the historical significance of the Castle, we were also entrusted to be sure that any compromises or deviations from the Castle's original plans were reviewed and approved by the entire project team.

The Rye Landmarks Advisory Committee, during their National Historic Preservation Week, recognized and acknowledged the coalition of the project team for our contribution to the restoration of this historic resource to a productive public use.
